

Seminar on ‘Achieving Better Climate Control through chillers’ in Nagpur

Few big estate developers acquired land in and around Nagpur city. In addition to the land acquisition, Central & State Government would be coming up with a mega project in Nagpur – ‘Multi-modal International Cargo Hub’ which is going to be Asia’s largest transportation hub with lot of associated modernized facilities. Quite a few IT industries are also eyeing up the city as next preferred destination.

ISHRAE Nagpur chapter is quite actively pursuing many activities with regular frequency to improve awareness related to HVACR amongst their chapter members. Kirloskar Chillers and ISHRAE Nagpur chapter jointly organized seminar on 16th July, and invited chapter members, few delegates from different industries around, and their student chapter members. The seminar was on the theme of ‘Achieving better climate control thru Chillers’.

The seminar received an overwhelming response, with 100+ delegates attended from different fraternities viz. HVACR consultants, contractors, architects & student chapter members. The key messages that were addressed thru the seminar, were –

- Overview of LEED-India certification, and importance of HVAC in LEED rating
- LEED-India certification requirements and how comfortably Kirloskar Centrifugal & Screw chillers meet its requirements

ISHRAE Nagpur chapter thanked Kirloskar Chillers for making the session thoroughly interactive.
